

ONYIA OKWUDILI OLIVER

Lagos, Nigeria – okwudilionyia139@gmail.com +234 907 624 2001 [LinkedIn](#)

RESEARCH INTERESTS AND OBJECTIVE

Cybersecurity & System Resilience • ERP Software & SAP Systems • Supply Chain & Logistics Technology • Distributed Systems Design • Secure Enterprise Architecture • Accessible & Inclusive Computing • IT Infrastructure in Emerging Economies

Objective: A naturally inquisitive IT professional driven to continuously study, learn, unlearn, and improve across ERP/SAP, supply chain, cybersecurity, and telecom/mobile technologies. Eager to bring this adaptability and hands-on IT experience to a reputable, dynamic team, where I can contribute meaningfully and keep growing.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science Caleb University

Lagos, Nigeria 2019 – 2023

- **Thesis: Development and Evaluation of an E-Learning Platform for Visually Impaired Students** designed and implemented a full accessibility-first learning system with screen-reader integration, keyboard navigation architecture, and low-bandwidth optimisation.
- Conducted structured usability evaluations with target users, measuring interaction efficiency and identifying design gaps; demonstrated measurable improvement in digital accessibility outcomes.
- **Coursework:** Data Structures & Algorithms, Operating Systems, Database Management, Computer Networks, Software Engineering, Information Security, Human-Computer Interaction.
- Department Research Team Member; provided peer mentorship to junior Computer Science students in programming fundamentals and academic writing.

Diploma in Computer Science University of Lagos

Lagos, Nigeria 2019 – 2020

PROFESSIONAL EXPERIENCE

Operations Support Cobranet Limited (voluntary)

Lekki Phase 1, Lagos February 2026 – Present

- Strengthened team performance by managing the end-to-end service ticket lifecycle for a portfolio of corporate and residential ISP clients, coordinating across technical, field, and account teams to resolve escalated incidents.
- Monitor network performance KPIs daily and generate service delivery reports tracking SLA uptime compliance across multiple client accounts.
- Serve as the coordination bridge between the sales and technical teams, resolving client onboarding delays and improving cross-departmental communication workflows.
- Provide remote first-line troubleshooting for connectivity faults, reducing unnecessary field dispatch and improving technician scheduling efficiency across service regions.

Inbound Customer Representative Blue Ridge Microfinance Bank (OPAY)

Lagos June 2025 – August 2026

- Served as first point of contact for inbound customer calls at a digital banking platform, resolving live service incidents in real time and maintaining a professional customer experience.
- Assisted in troubleshooting network and application-layer issues alongside technical teams, helping maintain business continuity and high system availability during peak transaction periods.
- Supported customers with limited access to alternative formal financial services, an environment where responsive, accurate incident handling directly shaped financial inclusion outcomes.
- Logged and escalated recurring customer-reported issues, contributing to process improvements that reduced repeat incidents and strengthened overall service reliability.

Field Support Engineer / SAP Junior Consultant (NYSC) Dangote Group PLC

Lagos Jun 2024 – May 2025

- Supported the deployment and configuration of SAP S/4HANA (Sales & Distribution module) across multiple operational sites within one of Africa's largest industrial enterprise system environments.
- Resolved live SAP SD incidents affecting order-to-cash processes, diagnosing root causes and implementing fixes that restored operational continuity with measurable reduction in processing delays.
- Delivered on-site technical support across several Dangote facilities, reducing system downtime through proactive fault diagnosis and rapid hardware/software intervention.
- Translated complex system-level findings into operational language for non-technical business stakeholders, supporting informed decision-making for business continuity planning.
- Gained hands-on, cross-module exposure to SAP's enterprise architecture beyond core SD — including Materials Management (MM) and Human Capital Management (HCM) — deepening understanding of system integration patterns, module interdependencies, and the real-world consequences of distributed system failure at enterprise scale.
- Complemented on-site functional exposure with self-directed study to advance from foundational to advanced-level SAP proficiency, applying IT infrastructure and network-troubleshooting expertise alongside SAP functional analysis to bridge technical and business-process problem-solving across Dangote's multi-site environment.

Project Support Staff Molchec Construction Company Ltd

Lagos October 2023 – March 2024

- Coordinated workforce allocation and material procurement across three concurrent infrastructure projects, demonstrating organisational and cross-functional planning skills.
- Supported project logistics and scheduling to ensure on-time delivery of project milestones across pipeline construction operations.

Cybersecurity Intern Digital Encode Ltd

Lagos July 2022 – December 2022

- Conducted structured vulnerability assessments on web applications and network systems using Burp Suite, Netsparker, and Nessus mapping findings against the OWASP Top 10 framework.
- Assisted in penetration testing engagements across application, network, and infrastructure layers, identifying security gaps in client systems with detailed severity classifications.
- Documented discovered vulnerabilities with remediation recommendations, contributing to final client security reports reviewed and validated by senior analysts.
- Developed working knowledge of common exploit patterns, attack surface analysis, and the relationship between software design decisions and long-term security exposure.

TECHNICAL SKILLS AND CERTIFICATIONS

Cybersecurity: Burp Suite, Nessus, Netsparker; OWASP Top 10; vulnerability assessment; penetration testing support; security documentation

Enterprise Systems: SAP S/4HANA (SD Module) — deployment, configuration, live incident resolution, order-to-cash workflows

Programming & Data: Python, SQL, Java (foundational); WCAG accessibility standards implementation

IT & Networking: Network fault diagnosis, hardware/software maintenance, ISP operations, SLA monitoring, systems documentation, KPI reporting

Productivity & Analytics: Microsoft Office Suite (advanced), Power BI (working knowledge)

Certifications: SAP SD — Basic to Advanced Level, Udemy (2026); Certified in Cybersecurity (CC), ISC2; Introduction to Cybersecurity, Cisco Networking Academy

LEADERSHIP & SERVICE

- **Academic Research Team Member, Caleb University** mentored junior Computer Science students in programming fundamentals, with measurable improvement in peer academic performance.
- **Captain, Caleb University Volleyball Team** led team selection, training coordination, and competition strategy over two seasons.
- **Gold Medalist, Faculty Table Tennis** Caleb University Faculty Games.
- **Protocol Lead, RCCG Youth Congress** coordinated logistics and protocol management for a large-scale national faith-based youth conference.
